

ANURAD PANYAM

ASPIRIG FULL STACK DEVELOPER

SUMMARY

Enthusiastic and technically skilled Aspiring Full Stack Developer with foundational knowledge in JavaScript, React, and Node.js. Proven ability to develop and maintain responsive web applications, demonstrated through academic projects and internships. Adept at collaborating with cross-functional teams to deliver high-quality software solutions. Passionate about continuous learning and staying updated with the latest industry trends and technologies.

EDUCATION

- **Bachelor of Technology in Computer science of Engineering** September 2026 - July 2029
NxtWave Institute of Technology
CGPA: 3.7/4.0
Focused on software development, web technologies, database management, and programming concepts. Developed academic projects including Trust Us Service Management Website, Student Management System, and Quickart, a basic frontend web application, using HTML, CSS, JavaScript, Python, Flask, and SQLite.

PROJECTS

- **Trust us** [Code](#) [Demo](#)
Technologies: HTML | CSS | JAVA SCRIPT
 - Trust Us – Cybersecurity Services Website
 - Developed a responsive and modern cybersecurity service website inspired by real-world enterprise platforms. The project showcases services such as penetration testing, cloud security, compliance management, managed IT services, and risk assessment through an interactive and user-friendly interface. Implemented responsive UI components, smooth navigation, service sections, contact forms, and optimized layouts using modern web technologies. Focused on improving user experience, mobile responsiveness, and clean frontend architecture.
 - Tech Stack: HTML, CSS, JavaScript
 - You can also use this shorter version for resumes with limited space:
 - Built a responsive cybersecurity services website with modern UI/UX, showcasing penetration testing, cloud security, and managed IT solutions using ReactJS, JavaScript, HTML, CSS, and Node.js. Inspired by enterprise-level cybersecurity platforms.
- **Quickart** [Code](#) [Demo](#)
Technologies: HTML5 | CSS3 | JavaScript (ES6) | React JS | React Hooks (useState | useEffect) | API handling REST API / Fetch API / Axios
 - Developed a single-page application using React JS, leveraging React Hooks such as useState and useEffect for state management and side effects.
 - Implemented responsive and dynamic UI components with HTML5, CSS3, and JavaScript (ES6), ensuring cross-browser compatibility and mobile responsiveness.

ONLINE PROFILES

- 🌐 LinkedIn Profile
- 🐙 GitHub Profile

KEY SKILLS

- HTML, CSS, JavaScript, React.js
- MongoDB, SQLite, MySQL, Python and DBMS
- Git, GitHub, VS Code, Responsive Web Design
- Basic GenAI

LANGUAGES

- English — Intermediate
- Telugu — Native
- Hindi — Intermediate

- Integrated REST API endpoints using Fetch API and Axios for efficient data retrieval and manipulation, enhancing the application's performance and user experience.
- Designed and implemented a custom image gallery with lazy loading and infinite scroll features, optimizing load times and improving user engagement.
- Utilized React's Context API for global state management, reducing prop drilling and improving code maintainability.
- Overcame challenges related to API rate limiting by implementing client-side caching strategies, reducing the number of API calls and improving application performance.
- Developed a comprehensive testing suite using Jest and React Testing Library, ensuring high test coverage and application reliability.

● **Student Management System**

[🔗 Code](#) [🔗 Demo](#)

Technologies: PYTHON | SQL

- Designed and implemented a Python-based backend using Flask for handling HTTP requests and responses.
- Developed a SQL database schema for storing student records, courses, and enrollment information.
- Created a comprehensive set of CRUD (Create, Read, Update, Delete) operations for managing student data.
- Implemented data validation and error handling to ensure data integrity and robustness.
- Optimized SQL queries for faster data retrieval and improved overall system performance.
- Developed a secure authentication system for user login and role-based access control.
- Integrated the backend with a frontend framework to provide a seamless user experience.
